

# HX25Az HX30Az

COMPACT EXCAVATOR

Engine Output  
24.8 hp (18.5 kW)

Bucket Capacity  
0.06 m<sup>3</sup>

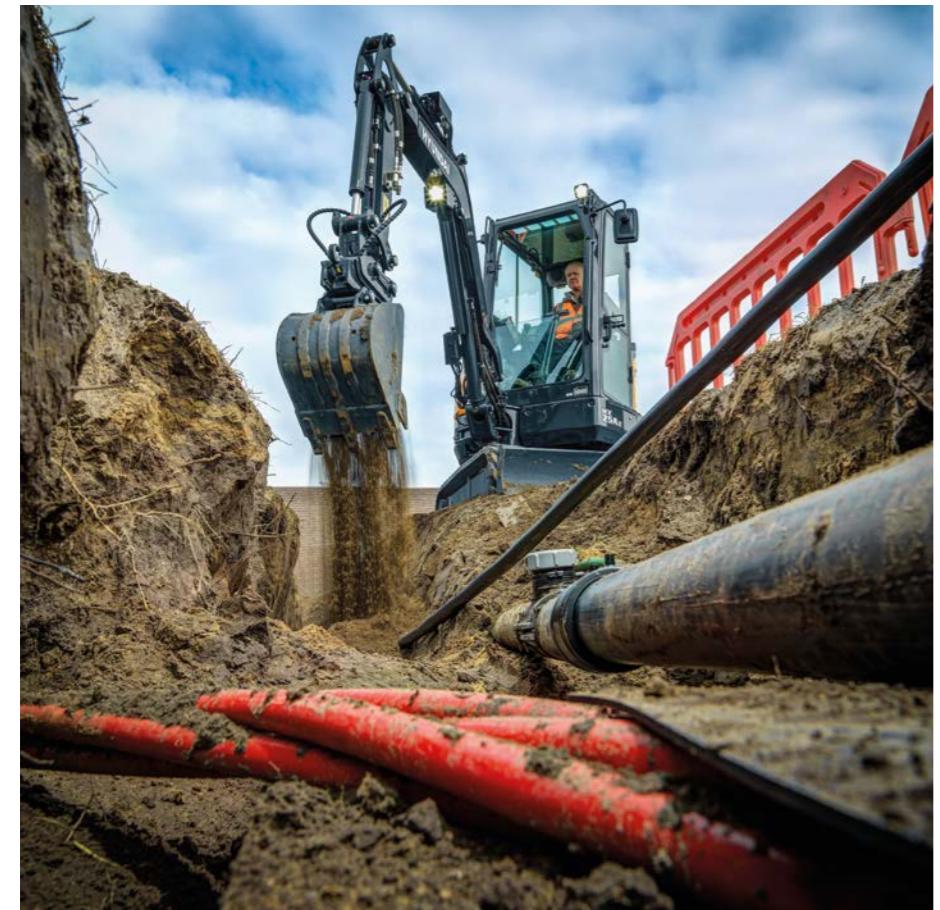

Operating Weight  
2685 – 2890 kg

# BREAKING STANDARDS IN PRODUCTIVITY & PERFORMANCE

Introducing two new HX A-Series compact tracked excavators, the HX25A Z and HX30A Z with zero tailswing. Both machines benefit from brand-new Stage V engines, delivering 24.8 hp (18.5 kW) gross power. The machines are also available with quick coupler fitting, for easy attachment changes to increase your productivity.

## Greater efficiency

The new engine meets EU Stage V emission regulations without needing special exhaust after-treatment devices, resulting in reduced maintenance costs.

## ◀ 2-way auxiliary piping

Both models are equipped with 2-way auxiliary piping as standard. Single or double acting mode can be selected by the operator.

## Quick coupler piping OPTION

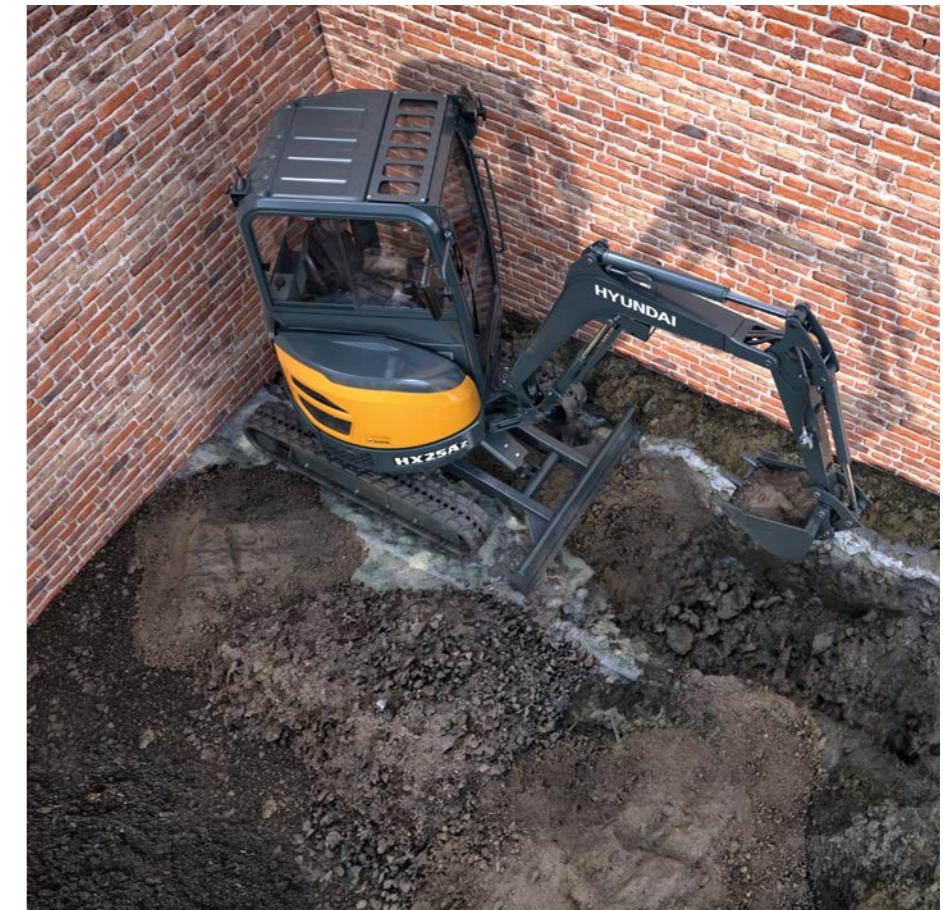

The HX-A mini excavators are available with an optional factory-fitted hydraulic line to operate any hydraulic quick coupler. This allows quick changes of attachments without having to leave the cabin.

## ◀ True zero-tail

The HX25A Z and HX30A Z are both true zero tailswing excavators with no rear overhang, allowing them to rotate freely within their own footprint. This enhances manoeuvrability and safety, while minimising the risk of damage to surrounding structures.

## Long arm OPTION

Several dipper arm length options are available to perfectly adapt your machine to match the job in hand.

## ◀ Easily transportable

With a compact zero tailswing design and low 2610 kg weight, the HX25A Z can be easily transported on any small trailer together with a quick hitch, a breaker and 3 buckets without exceeding the regulatory weight limit.

# BREAKING STANDARDS IN COMFORT & EASE OF USE

Our new cabin has been designed with operator comfort and convenience in mind. Optimised ergonomics and advanced features allow you to work with greater ease and efficiency. With its spacious interior and high-visibility design, our new cabin offers an unparalleled level of comfort and safety, ensuring that you can work for extended periods without fatigue or discomfort.

## ◀ New 5-inch digital display

The HX-A mini excavators have a new 5-inch LCD full-colour display monitor, allowing you to easily control excavator settings and quickly access critical functions and daily operations. The monitor is also IP68 waterproof, especially important if working in a canopy model.

## Auto-shift travel speed

This automated feature allows for seamless transitioning between high and low travel speeds, allowing the operator to focus on the task at hand while the machine takes care of speed and traction adjustments.

## ◀ Excellent visibility

Experience a whole new level of visibility with our latest cabin design. Enhanced visibility provides you with a wider and more expansive field of view, giving you a clear and unobstructed view of your surroundings.

## Dozer blade lever and Drive speed switch **A**

Two-handed operation for skilful and efficient levelling with drive mode changeover on the drive lever handle.

## Proportional joysticks **OPTION B**

The proportional joysticks greatly improve the operating efficiency of your machine and attachments.

## ◀ Modern audio system

Relax with convenient modern functions like the MP3 radio with added USB ports and enjoy hands free calls.

## Canopy version **OPTION**

To better adapt to different work environments, both machines can be supplied with a canopy.

**365  
DAYS  
COMFORT**

# BREAKING STANDARDS IN SAFETY

HD Hyundai excavators have some of the highest safety standards in the industry, offering state-of-the-art features, some of which are unique in the industry. Our philosophy is to care for the machine, operator and the environment.

## » Auto Safety Lock

The auto safety lock prevents unintentional ignition and machine movement. When the safety lever is locked, the engine cannot be started and the system will not engage.

## Overload warning

Available as standard, this warning device gives an audible and visible alarm when there's too much weight being lifted, to alert the operator.

## » Cabin structure

The HX A-Series cabin structure uses integrally welded low-stress, high strength steel to meet ROPS, TOPS and FOPS certification.

- **ROPS:** Roll-Over Protective Structures ISO12117-2
- **TOPS:** Tip-Over Protective Structures EN13531
- **FOPS:** Falling Object Protective Structures Level 1, ISO3449

## » Anti-theft system

The system includes a password-protected ignition key, to prevent the engine from starting without the correct key. Additionally, there is an optional GPS tracker (Hi-Mate) that allows you to quickly locate the machine in case of theft.

## Work light & beacon lamp OPTION

## Safety Belt NEW Warning Alarm

Travel Alarm  
Emergency Engine Stop Switch

## » Safety valves

The safety valve on the boom, arm and dozer blade cylinder ensures safe digging or lifting with the blade down, even in case of a sudden pressure drop.

TECHNOLOGY  
TO KEEP YOU  
**SAFE**

## » New cylinder and hose protection

New cylinder guards as standard on the boom, arm and bucket provide increased protection, reducing the risk of downtime and costly repairs. Our new boom design routes the hydraulic hoses inside to avoid damage when working, enhancing safety and durability.

# BREAKING STANDARDS IN SERVICEABILITY & TELEMATICS

The true value of HX A-Series machines lies in their durability with robust structures and attachments, as well as easy access for maintenance and long service intervals. Cutting-edge telematics allows owners and operators to access vital machine information onboard and remotely.

## Designed for easy maintenance

Our machines feature wide opening access panels. These panels provide ample space for you to reach and service key components with ease.

QUICK SERVICING FOR MAXIMUM UPTIME

## Improved attachment durability

Our upgraded attachments are designed to withstand the toughest work environments, featuring reinforced steel components and advanced welding techniques to ensure maximum strength and longevity.

## Hi MATE

It's convenient, easy and valuable. Hi MATE, HD Hyundai's remote management system, utilises GPS satellite technology to provide customers with the highest level of service and product support available.

### Increase productivity

By providing information such as service hours, and idle time, Hi MATE saves you money and improves productivity. Service alerts enable better maintenance planning.

### Monitor your machines

Hi MATE's real-time location information allows convenient monitoring of your equipment via the Hi MATE website or mobile app.

### Mobile fleet app

Our new mobile app provides all the information you need to run your equipment more efficiently and economically. It has been optimised for fleet management, providing health insights based on telematic technology to keep your machines working at maximum performance.

### Improve Security

Protect your equipment from theft or unauthorised usage. Hi MATE's geofencing alerts notify you automatically when a machine leaves a predetermined zone.

### Keeping you covered

HD Hyundai Genuine Parts and Accessories are designed to keep your machine running at optimum performance, with 24-hour delivery across our dealer network. HD Hyundai Standard and Extended Warranty Programmes provide peace of mind and give you full control over your operating costs.

1. Lifting capacities are based on ISO 10567.

2. Lifting capacity of the HX A-series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.

3. The Lift-point is bucket pivot mounting pin on the arm (without bucket mass).

4. (\*) indicates load limited by hydraulic capacity.

5. Caution: please be aware of the local regulations and instructions for lifting operations.
